Initiative Application — Data Engineer/Data Analyst

Dear Hiring Team at ITG GMBH,

I am excited to submit this initiative application for a Data Engineer/Data Analyst position at ITG GmbH. With more than 4 years of experience designing scalable data pipelines, automating analytics workflows, and translating complex datasets into actionable business insights, I am eager to help ITG accelerate its digital-first logistics strategy.

Why ITG GmbH?

ITG’s reputation for end-to-end logistics solutions paired with its clear commitment to digital transformation strongly resonates with my professional focus. Your recent investments in data-driven process optimization and cloud-native analytics present the exact challenges in which I excel: building robust data infrastructure while ensuring that insights reach decision-makers quickly.

How I Can Contribute?

Strength	Example Impact	Relevance to ITG
Cloud & ETL Engineering	Built 50+ Spark/Databricks pipelines for Starbucks, enabling daily warehouse loads and improving ingestion speed by 30%	Modernize ITG’s data landscape, ensuring fast, reliable freight-flow analytics
Automation & Reliability	Developed Python scripts reducing manual data handling by 80% and engineered Airflow monitoring that saved 1,440 hrs/month	Drive operational efficiency and SLA adherence in your freight management systems
Insightful Dashboards	Delivered 100+ Power BI dashboards guiding cross-functional decisions at Mercedes-Benz Mobility	Provide real-time KPI visibility to ITG’s operations, finance, and customer teams
Predictive Analytics	Deployed Azure ML risk-classification models to identify high-risk user segments	Support proactive exception handling and demand forecasting within supply chains
Cross-Functional Collaboration	Led data initiatives across 5+ international markets, aligning product, engineering, and business stakeholders	Facilitate smooth roll-outs of digital logistics solutions across ITG’s global network

Alignment with ITG's Needs

- My end-to-end project experience—from data ingestion to dashboard delivery, fits perfectly with ITG's focus on transparent, data-rich logistics services.
- Leveraging proven proficiency with Azure Data Factory, Apache Spark, and CI/CD practices, I can help establish a future-proof, cloud-native architecture that scales effortlessly alongside your business.
- Just as important, every solution I design is tied to measurable operational gains, a mindset that directly supports ITG's goals of shortening lead times and reducing cost-to-serve.

I welcome the opportunity to discuss how my data engineering and analytics background can create immediate value for ITG GmbH. I am available at your convenience for an interview.

Thank you for considering my proactive application. I look forward to contributing to ITG's continued success.

Warm regards,

Nallaperumal Krishnan
